NOBLE NURSERY

Noble, Oklahoma

Marked Copy. p 4.

PRICE LIST—NOBLE NURSERY, NOBLE, OKLA.

C. E. GAREE

Mrs. Garee is not especially active in the nursery business except a few weeks while the spring rush is on. At this time she has charge of the retail billing department and exerts her best efforts to have every order filled just as she would like it if she were the buyer instead of you.

In the fall of 1899 the present owner planted in his back lot about a bushel of peach seed, and toward spring 2000 apple grafts and a few hundred plum grafts and grape cuttings. From that little start has grown one of the leading nurseries of the state, not the largest in acreage, but offering one of the most complete lines of fruit and ornamental stock in this section. The oldest nursery in Oklahoma without change of management or location.

EVA D. GAREE

PRICE LIST—NOBLE NURSERY, NOBLE, OKLA.

THE following prices represent real tree and plant value direct from the grower. No agent's commission or middleman's profit to pay if you deal with us. This little folder is our only traveling salesman. His salary and expenses for the year amount to but a few cents. The saving to us and to you is easily seen by comparing our prices with those asked by the tree peddlers who visit you from time to time.

Twenty-five years experience here at Noble in south central Oklahoma demonstrate fully that in the production of high class nursery stock, our soil and climate are unsurpassed. You cannot buy better trees than ours, no matter what you pay.

We are growers of what we sell. Practically everything we offer is grown here and may be seen in our own fields. A few items are grown for us elsewhere or bought from other nurserymen as needed.

The maintenance of our present scale of prices depends upon the production of stock in moderate quantities, and upon selling off close each season with as little waste as possible. We hope to have sold most everything before the spring planting season ends, hence we urge our friends to place orders early while the stock is unbroken.

We guarantee every plant we sell true to name or description and to reach you in growing condition, but assume no liability beyond the price paid. Complaints for errors should be promptly made.

Half dozen at dozen rates, twenty-five or more at hundred rates, and may be assorted 5 of a kind. Three hundred and up at thousand rates. Berries and grapes should be 25 or more of a kind to take hundred rates. Long lists calling for 1 or 2 of a kind will be charged at each rates, except that roses and shrubs may be one of a kind, if desired, at dozen rates.

Prices do not include postage. If you wish shipment by parcel post allow a little for that. Plants, vines and small trees go by post cheaply in moderate quantities. Not to exceed a dozen 4 to 5 ft. trees may be cut back to make a package within the postal limits.

Our nursery has passed official inspection every summer since 1905. Under the law no nursery can do business in Oklahoma without inspection and every shipment must carry a copy of the current year's health certificate. Watch for it.

PRICE LIST—NOBLE NURSERY, NOBLE, OKLA.

PEACH TREES—Budded 1-year tops on 2-yr. roots; 2 to 3 ft. 15c, per 100 \$12.50; 3 to 4 ft. 20c, per 100 \$15.00; 4 to 6 ft. 25c, per 100 \$22.50.

June Varieties—Mayflower, Wheeler Cling, Alexander, Carman.

July Varieties—Triumph, Mamie Ross, Early Crawford, Hiely, Ray, Japan Dwarf.

August Varieties—Champion, Belle of Georgia, Lee Cling, Oldmixon Cling, Amrein Cling, Elberta, J. H. Hale, White Nectarine, Red Nectarine.

Later Varieties—Crosby, Stump Salway, Heath Cling, Everett Cling.

APPLE TREES—Grafted, 2-year olds, priced same as peach.

Summer Varieties—Early Harvest, Yellow Transparent, Red June, Maiden Blush, Liveland, Red Astrachan, Boomer, Golden Sweet, Wealthy.

Fall Varieties—Grimes Golden, Jonathan, Delicious, King David.

Later Varieties—Black Ben Davis, Wine-sap, Mammoth Black Twig, Stayman, Missouri Pippin.

Crabs, same price. Whitney, Hyslop.

Double Worked Grimes.—This excellent tree is attacked in some localities by a very destructive root rot or collar rot. To avoid this trouble it is top-budded several inches from the ground on a variety not subject to the disease. We offer these double worked or "double life" Grimes Golden at 35c each; \$30.00 per 100.

PLUM TREES—Budded 1 year tops on 2-year roots, 2 to 3 ft. 25c, per 100 \$20.00; 3 to 4 ft. 30c, per 100 \$25.00; 4 to 5 ft. 50c, per 100 \$40.00; 5 ft. up, heavy, 75c.

Early Gold, Opata, Sapa, Omaha, Compass, Gold.

Opata and Sapa are marvels for quality and production. They usually bear at one year from planting, and give profitable crops at two and three years. They grow rather dwarf and may be closely planted or used for "filler" planting among other trees.

Waneta Plum—Our first tree of this variety, bought from the introducer in 1919, proved to be a worthless seedling, and we budded and sold a few trees from it before the error was discovered. If you ever bought a Waneta from us dig it up now, without waiting to be disappointed, and let us give you a good tree of your selection to put in its place. We hope to offer the true Waneta next season.

APRICOT—Ever since the fall of 1900, we have been propagating the finest Apricot we ever saw, but without a name. It came here in the early days as Moorpark, but is larger, darker, better, and is gone just as Moorpark ripens. We have decided to name it "Noble." Plant Apricots on high land to escape late frosts. Only two varieties in stock, Noble and Moorpark. Priced same as plums.

CHERRY TREES—Best 2-yr. stock \$1.00, per 100 \$85.00; best 1-year and medium 2-year 75c, per 100 \$60.00; smaller size, 2 to 3 ft. 50c, per 100 \$35.00.

Early Richmond, Montmorency, Large Montmorency, English Morello.

Moulton Sweet Cherry—Either a new variety or an unidentified European variety growing at Moulton Fruit Farm, west of Oklahoma City. Bore five good crops in succession, and made only one total failure in ten years. Large, meaty, light red, mid-season, high quality. A sweet cherry that will thrive here and produce good crops has

PRICE LIST—NOBLE NURSERY, NOBLE, OKLA.

been a long felt want among orchardists. This one has satisfied us of its ability to deliver the goods.

Heretofore we have grown the trees only under contract for Mr. Moulton, and he allowed us to sell a few at \$2.00 each. This season we have plenty of good 1-year trees at \$1.00 each or \$85.00 per 100.

PEAR TREES—Best 2-year grafted or budded 60c, medium size 40c, 1 year 2-3 ft. 25c. Ask for prices in hundred lots.

GRAPES—No fruit gives quicker or surer results. The old idea of taking 3 years to establish a vineyard is a back number. If you make your trellis when you set the plants, cultivate well and get your vines running and climbing by the middle of the first summer, you can gather half to a full crop of grapes the second.

One year and 2-year vines, 10c each, \$1.00 per dozen, \$5.00 per 100. Campbell's Early Brighton, Lucile, Delaware and Carman not sold at hundred rates. Heavy 2-year vines of most varieties 15c each, \$1.50 per dozen.

Black or Purple—Champion, Campbell's Early, Carman, Clinton, Ives, Concord.

Red and Brown—Brighton, Salem, Lucile, Delaware, Agawam, Catawba.

White or Light—Diamond, Niagara.

BERRIES—We grow a few acres of Blackberries for market and have tested several varieties without finding one that we care to raise here except Early Harvest, which bears a good crop each season, and always makes a little money.

Choice nursery grown plants, per dozen, 50c; per 100, \$3.00; per thousand, \$25.00. Every plant a good one. Second size plants, half price. Other varieties priced on application.

Raspberries—50c per dozen, \$3.00 per 100.

Dewberries—50c per dozen, \$2.00 per 100.

THORNLESS DEWBERRY—A new fruit of a great merit, which promises to supercede all thorny varieties. Good bearer. Try it. Dozen \$1.00; per 100, \$5.00.

Everbearing Strawberries—\$2.00 per 100.

Common Strawberries—\$1.00 per 100.

Strawberries are not shipped with other stock, but go out postpaid in time for spring planting. If wanted in thousand lots and up, write for prices.

FIGS—Bear good fruit nearly every year. 1 to 2 ft., 25c; per dozen \$2.50. 2 to 3 ft., 50c; per dozen \$4.00.

RHUBARB, WINEPLANT OR PIE-PLANT—The best variety we ever saw; big, early, pink, tender stalks. Does not make seed and is propagated only by dividing the old crowns. Strong Divisions, per dozen, \$1.50; per 100, \$8.00. Second size divisions, \$6.00 per 100.

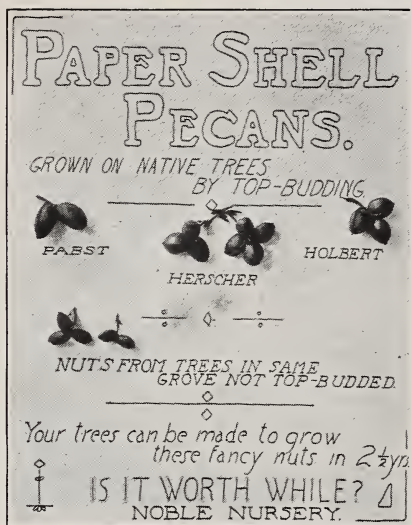

Linnaeus Seedlings, half price. We do not recommend the seedlings.

ASPARAGUS—Two-year roots. Dozen, 35c; 100, \$2.00.

GARDEN SAGE—Good rooted clumps, each 25c.

HORSE RADISH SETS—Per dozen, 35c; per 100, \$2.00.

PAPER SHELL PECANS—Pecan culture is attracting considerable attention in parts of Oklahoma. The quickest results are obtained by top budding on native trees where they stand in fields and partly cleared land. We have a few very fine trees of this type, and can put you in the way of duplicating them. Ask us about this work. Many of

Reproduction of a pecan exhibit we made at our County Fair.

the leading commercial varieties do well here; a few do not. Since the pecan is more difficult to transplant than some trees we recommend and sell only the small size trees. One year tops, \$1.25 each, \$14.00 per dozen.

SHADE TREES—If you are in a hurry for shade, plant the Non-Bearing, English, Paper White, Barren, French, Male or Shade Mulberry.

Not only is it the best tree for quick shade on good soil, but in hardpan and poor soils, it will respond to good care better than any other tree we ever saw. It has repeatedly shown its ability to live and make good

where other trees have failed entirely, and appears to be absolutely free from the attacks of aphids, scale insects, borers, bag worms or fungus diseases. Additional information about this tree will be given on application.

10 to 12 feet, 2 to 2½ in. stems—\$2.00 each
 10 to 12 feet, 1½ to 2 in. stems—\$1.50 each
 8 to 10 feet, 1¼ to 1½ in. stems—\$1.00 each
 6 to 8 feet, 1 to 1¼ in. stems—75c each
 6 to 8 feet, ¾ to 1 in. stems—50c each
 4 to 6 feet—25c each
 Smaller sizes, \$1.00 to \$2.00 per dozen.

Maple, Poplar, Elm, Hackberry, Sycamore, and other varieties at corresponding prices.

Catalpa Bungeii—Top grafted, on common catalpa, \$1.00 to \$2.50 each. State height of stems desired.

ROSES—Field grown plants of good quality. Have bloomed freely all season, and will please you. Each 50c; per dozen, \$5.00.

Reds—Etoile de France, Red Radiance, American Beauty, Crimson Queen, Crimson Rambler.

Whites—Kaiserin A. V., White Cochet, Frau K. Druschki, Clothilde Soupert, White Rambler.

Pinks—Radiance, Maman Cochet, Taft, W. R. Smith, Los Angeles, Dorothy Perkins, Climbing Cecile Bruner.

Yellows—Sunburst, Etoile de Lyon, Francisca Kruger, Alex H. Gray, Lady Hillingdon, Blumenschmidt, Marechal Neil.

Tinted—Ophelia, Dudley Cross

In addition to these, we have a number of other varieties under test and in course of propagation, but not in sufficient numbers to justify listing. They can be used in making up assortments for customers desiring them.

A pleasing corner of evergreens consisting of Boxwood, Dwarf Pine, Holly, Dwarf Golden, Standard Golden and Rosedale Arbor Vitae, Cedar of Lebanon, Red Cedar, Irish Juniper, Silver Juniper and Privet. Similar plantings can be made at an initial cost of \$25.00 to \$200.00 and up. At the lower price, small plants must be used and 2 or 3 seasons growth will be required, while by using the larger specimens effects like this may be had immediately.

EVERGREENS—Our Evergreens will live and grow for you because we dig and handle them right. All the large sizes have been transplanted two or more times to develop the root system, and are field grown without irrigation. We have discarded several fine varieties that are too hard to keep alive here in August.

Red Cedars—Single plants, 25c each and up; 50c per foot of height. Fancy sheared specimens 75c per foot. Pine, Juniper, Boxwood, Holly, Arbor Vitae, Euonymus, about 20 varieties, 50c to \$1.00 per foot. No plant sold for less than \$1.00. Beckman's Dwarf Golden Arbor Vitae, 24-inch, \$2.50; 18 to 24-inch, \$2.00.

Consult us about your needs in this line. We will give you A-1 service.

PRIVET FOR HEDGING—All the privets make excellent flowering shrubs. We offer

several varieties for that purpose but for hedges we sell and recommend only the Amoor River South and California. Both are hardy enough, Amoor being practically evergreen in this climate while California loses its foliage only after our most severe freezes. Heavy, well branched, 2-year plants 2 to 3 ft., \$1.00 per dozen; \$7.50 per 100; medium size, about 2 ft. branched, \$5.00 per 100; light weights, \$3.50 per 100; extra heavy 3-year plants \$2.00 per dozen, \$15.00 per 100.

HARDY SHRUBS—Good stock, mostly two or three years, field grown and ready to bloom the first season if planted early. Tall growing kinds are 3 to 5 ft., medium growers, 2 to 3 ft., and a few dwarfs and low growers, smaller. Each 50c, per dozen \$5.00. Second size plants of most sorts, half price.

PRICE LIST—NOBLE NURSERY, NOBLE, OKLA.

Japonica

Amoor North Privet

PEONAS—Separate colors, 50c each, \$5.00 per dozen, mixed colors, \$3.50 per dozen. Two year clumps, any color, \$1.50 each.

SANTALINA—Border plant, per dozen, \$1.00; per hundred, \$5.00.

CANNA BULBS, all colors, 75c per dozen.

GLADIOLUS BULBS, superb mixture of colors, 50c per dozen, \$3.00 per 100.

LANDSCAPING SERVICE—We are able to devote some time each season to this work, and have designed and made some very effective plantings. Let us make plans and estimates for planting your grounds. You will find our charges for this work quite reasonable.

VINES FOR PORCHES AND ARBORS—Purple, White and Blue Wistaria, Ampelopsis, Kudzu, Clematis Paniculata, Scarlet Trumpet, Honeysuckle in assortment. Prices same as for hardy shrubs.

PURE BRED POULTRY

For about twenty years we have maintained one flock each of Rose Comb and Single Comb Rhode Island Reds. They have been bred for egg and meat production rather than extreme show quality, yet have not lost that lustrous red color which is so much admired by all. Eggs and stock offered will be well worth the price.

Australian Ki Wi (kee wee)
The chicken that cannot fly.

A new American breed similar in size to Rocks and Reds, but covered with a silky white plumage, and developing no stiff wing feathers, thus reducing the fencing problem to a minimum.

Very pretty birds, with yellow legs, beak and skin, attracting attention wherever shown, and have already gone well over the 250 egg mark.

A few eggs to offer for spring at \$4.00 per 15, postpaid.
